TITLE: Post-operational testicular atrophy

SOURCE: Revista sanitara militara, v. 61, no. 1, 1965, 3-7

TOPIC TAGS: surgery, biologic reproduction

ABSTRACT: The authors observed 59 cases of sterility and sexual insufficiency following operations for inguinal hernia or other conditions, and present selected case histories to illustrate the consequences of injuries to the testicular parenchyma. They emphasize the danger that bilateral surgical interventions may damage both gonads, bringing about changes in the functional behavior of the opposite testicle, affecting sexual activity and fecundity and inducing the "castration syndrome". MILEK EDUARD

Changes in alkali-resistant hemoglobin in infants with whooping cough. Stanislav Hájek, Zdeněk Gregora, Eduard Milek, and Rudolf Kry! (Ustav soudní lékařství LFHKU, Prague). *Časopis lékařů českých* 96, 109-13 (1957).—Changes were studied in 7-18 month old infants. A relation was found between the amt. of alkali-resistant hemoglobin and the state of the subjects at a given time.

"Cardiovascular Changes in Patients Suffering from Ornithosis."

Prague, Casopis Lekaru Ceskych, Vol 105, No 36-37, 9 Sep 66, pp 985 - 987

Abstract [Authors' English summary modified]: Cardiovascular changes in 70 patients with ornithosis, confirmed by serological and epidemiological methods, were investigated. EEG changes of temporary toxic damage to the heart muscle were found in 21.4%, myocarditis in 4.3%, collapse in 2 patients, and thrombophlebitis of lower extremities in 2 patients. None of the 70 patients died during hospitalization. One patient died of an infarction 10 months after discharge from the hospital, one developed a coronary syndrome 8 months after discharge. 1 Table, 13 Western, 4 Czech, 1 Russian reference. (Manuscript received May 66).
